

Students will find, as they work through the activities associated with the State Fair of Texas Curriculum, that there are many, many career paths that can lead to the Fair! Below are dozens that we've broken out according to the 8 main Lesson/Quest categories. See if you and the kids can find the connections across the themes, and discuss with your students how important it is to value - and integrate - multiple subject areas in order to be the BEST in one's chosen field!

ELEMENTARY				HIGH SCHOOL
